

Gallaudet receives several major foundation grants

Gallaudet College has recently been awarded five grants totaling almost \$375,000. The funds will be used to organize a development program at Gallaudet, develop associate degree programs, provide scholarships and equip a self-study television room in the new Learning Center.

The largest grant, for \$250,000 was awarded by the Charles A. Dana Foundation toward the cost of organizing a systematic and comprehensive development program at Gallaudet. A primary function of the Development Office is soliciting funds from the private sector. Plans have been drawn up by the Development Office for the acquisition of major private funds for unrestricted use on an annual basis as well as for the acquisition of restricted funds for specific capital needs of the institution,

including increases to Gallaudet's endowment.

The Dana grant, which is the second largest grant from a private foundation ever given to Gallaudet, was awarded over a three year period. Major goals of the Development Office over the next three years will be to:

- Establish a national Annual Fund appeal using a volunteer network.
- Increase the initially successful efforts in obtaining corporate and foundation gifts.
- Establish a planned giving program (estate planning for charitable purposes).
- Identify, cultivate and solicit major donor prospects.
- Begin preliminary discussions to determine the feasibility of a capital fund program to increase the present endowment.

Because there is a considerable time lag between the initiation of new development efforts and the point at which there will be a corresponding increase in donations, the Dana grant will enable Gallaudet to add to its staff gradually over the next three years and help to pay for volunteer cultivation and training, related travel, planned giving counsel and publication expenses.

This is the third grant from the Dana Foundation, which gave Gallaudet \$100,000 each in 1967 and 1969.

A \$50,000 grant from the Surdna Foundation in New York City will help fund the first year of associate degree programs development and faculty development projects. Faculty members will be trained in other academic fields so associate degree programs can be implemented, and faculty members will also be developing the curricula for the new programs. The Foundation's support is particularly important to the College because of the long-range program planning needed to address expected enrollment increases. Rubella affected students should push the enrollment up 150% beginning in the fall of 1983, and this increase should last throughout the decade.

Gallaudet also received a \$30,000 grant from The Teagle Foundation this past December. This will be added to The Teagle Foundation Endowment Fund which was established to provide scholarships for American undergraduate students. Teagle has supported Gallaudet annually since 1976 and this latest grant brings the endowment fund to a total of \$145,000. The Teagle Foundation also established the N.J. Campbell Memorial Scholarship Fund at Gallaudet with a gift of

College Council nominations held

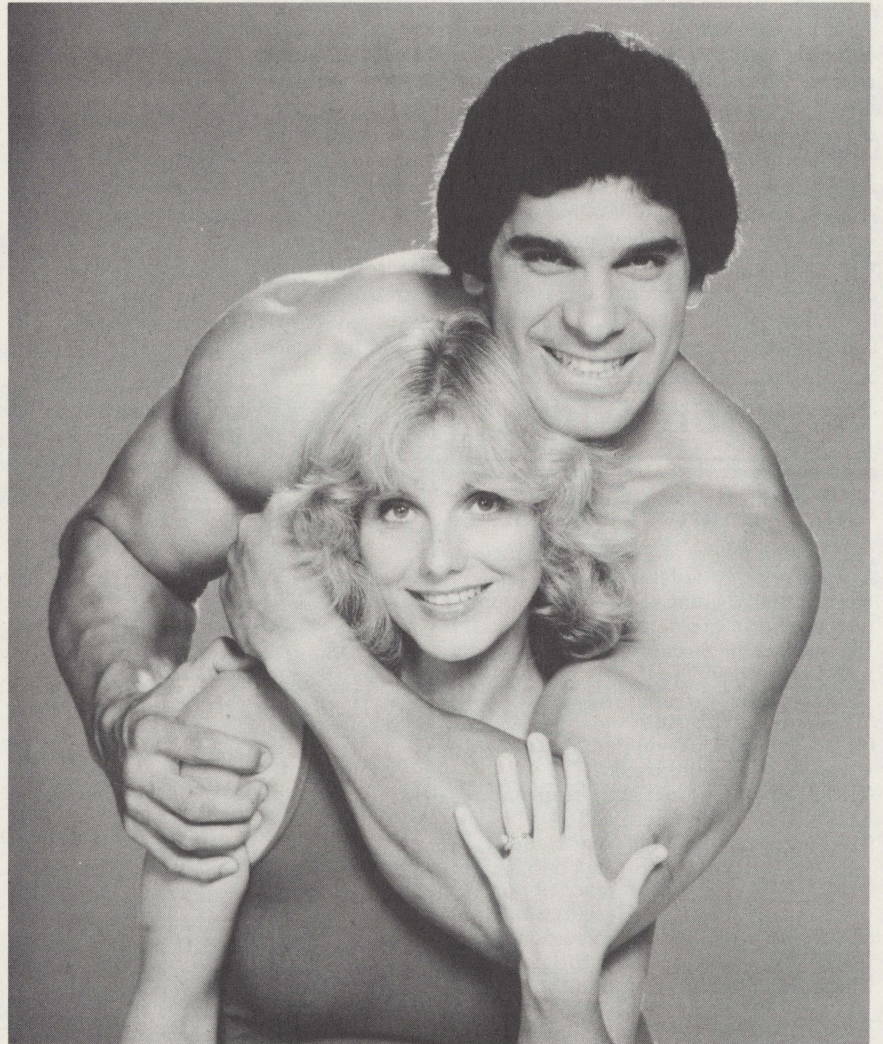

Nominations for College Council staff representatives were held Monday, Jan. 12 as the first step in a new system for Council representation. The election for new staff representatives to the College Council will be held Jan. 29.

The new system of representation, approved at the last College Council meeting Dec. 3, calls for a total of nine staff employees to be elected to the Council, by division: two each from the Divisions of Business Affairs, Academic Affairs and Pre-College and one each from the President's Office, Public Service and Research Divisions. In each of the three larger divisions, one of the two representatives must be an exempt employee and one must be non-exempt. Prior to this upcoming election, all staff representatives were elected at-large rather than by division.

The top two nominees for each College Council seat, to be announced in the next issue of *On the Green*, will become the candidates for the election.

Council members decided at their last meeting that the new system of representation would ensure that each division on campus would be represented on the Council. Representatives from each division would also be responsible for meeting with their respective vice presidents to plan division staff meetings.

The change in representation grew out of a memo that Edward C. Merrill, Jr. sent to Council members last October proposing the system of electing staff members by division and proposing tying in the Council with divisional meetings.

Lou Ferrigno, shown here with his wife, Carla, will chair Better Hearing and Speech Month.

"Hulk" to serve as chairman of Better Hearing and Speech Month

Television actor-strongman Lou Ferrigno, who overcame a hearing and speech problem himself, will lead Better Hearing and Speech Month efforts next May by serving as chairman of the month-long public information campaign on behalf of 22 million Americans with hearing, speech and language disorders.

Ferrigno will launch the campaign during May 1 kickoff ceremonies in Washington, DC, where he will release a special message from President Reagan, introduce the 1981 Better Hearing and Speech Month poster child and begin a series of national media appearances. He will be representing 15 leading national organizations, including Gallaudet College, who have united in sponsoring the effort to inform and help people with hearing and speech impairments.

Ferrigno is the star of the CBS-TV series "The Incredible Hulk" and will be featured in his first speaking role in "the King of the Beach" episode due to air in February. He also has been slated to

play opposite Robert Blake in the Steinbeck classic "Of Mice and Men" for NBC. The actor holds the distinction of being the only and youngest man to ever capture the Mr. Universe title twice consecutively.

Ferrigno has spoken openly of his hearing problem in public appearances. "We are all handicapped, some more noticeably than others," he says of his 75% of childhood hearing loss.

Sponsoring organizations in the Council for Better Hearing and Speech Month include the American Council of Otolaryngology, Association of Service Programs in Communicative Disorders, Better Hearing Institute, Boys Town Institute for Communication Disorders in Children, Ear Research Institute, EPA Noise Office, FDA Bureau of Medical Devices, Gallaudet College, Hearing Industries Association, International Lions Hearing Center, National Captioning Institute, National Hearing Aid Society, National Technical Institute for the Deaf, Sertoma Foundation and Suzanne Pathy Speak-Up Institute, Inc.

A look at Safety and Security

by Allen Nowell

University and college campuses are really communities and, in some cases, cities. They contain residential areas, office buildings, parks and recreational areas, places of worship, banks, a post office, a hospital or infirmary, schools, streets and roadways.

Campus communities also have a need for police services. The priorities of academic communities, which center on educational and learning processes, have an impact on the nature of police services. Unlike municipalities, campus communities have administrative recourses which often are more appropriate and effective in responding to incidents and situations on campus. Such administrative recourses include the president, dean of students, counselors, student courts, and parking and traffic committees. Many problems which in a municipality would require arrest and prosecution through criminal courts can be handled administratively on a college campus.

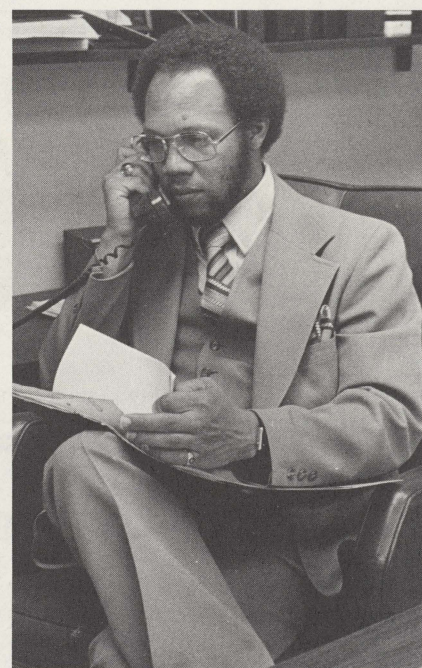

Public law enforcement agencies have not always been sensitive to or understanding of the uniqueness of the academic community. Nor have academicians and students, viewing the police as "outsiders," always been understanding of the police.

Out of this background emerged a national trend toward the campus police department. Such departments were organized as part of the college or university. Its members identified with the academic environment in which they served, as well as with professional law enforcement. They tended to be better educated (most college graduates themselves), better trained and more effective than the night watchmen and security guard operations which they replaced. Although empowered with full police powers and authority, they demonstrated restraint in exercising those powers. Campus police organizations felt as comfortable with administrative processes as with the criminal justice system. They not only understood the concept of academic free-

dom, they were committed to it.

The Department of Safety and Security at Gallaudet is such a campus police organization. There are no "security guards" or "night watchmen" at Gallaudet. The members of the Department of Safety and Security are police officers with the same authority as the Metropolitan Police Department on Kendall Green. Campus police officers at Gallaudet are carefully selected, highly trained law enforcement officers, yet their attitudes and approach to their duties, and the ways they operate often differ significantly from that of municipal police departments. Campus police officers attempt to perform their security and law enforcement duties in harmony with the academic environment in which they serve and of which they feel a part.

During the coming weeks, *On the Green* will be taking a look at the Department of Safety and Security in a series of articles, examining what the campus police do, how they do it and who they are.

Floyd Holt is manager of the Department of Safety and Security.

Sponsored R&D

Grant/Contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities. For more details call Glenn Pfau, Office of Sponsored Research, x5030 (Voice or TDD).

Deadline	Program
01/16/81	HSA—Maternal/Crippled Child/Health
01/23/81	OSE—Youth Employment Research
01/23/81	OSE—Minority Handicapped Research
01/27/81	ED/NIE—Teaching and Learning Research
01/27/81	ED—Women's Educational Equity Act Program
01/30/81	OSE—Regional Education Programs for Deaf & Other Handicapped
01/31/80	NSF—Public Understanding of Science
02/06/81	OSE—Field Initiated Research
02/18/81	OSE—Handicapped Early Childhood Assistance (model projects)

Weekly program highlight

The National Institute of Education announces competitions for grants to support research on teaching and learning in seven areas: Language and Literacy, Mathematics Learning, Basic Cognitive Skills, Teaching in School Settings, Teaching and Learning in Out-of-School Settings, Social Processes, and Testing and Evaluation. The deadline date for proposals submissions is Jan. 27, 1981 for four of the areas—Language and Literacy, Basic Cognitive Skills, Teaching in School Settings, and Testing and Evaluation. These awards will be announced in May 1981, with project starting dates as early as September 1981. The proposal deadline for the other three areas will be in October 1981, with the specific deadline date to be announced later in the *Federal Register*. NIE estimates that it will award 50 to 60 grants this year, ranging in size from small grants of under \$15,000 to larger grants with budgets averaging \$50,000 per year.

The six piece rock group "7th Dawn" appeared at MSSD Dec. 17, playing for a standing room only audience in the MSSD auditorium. MSSD students signed the songs as the group performed. The concert was videotaped by Gallaudet TV. Plans call for disseminating the videotape to other schools and cable television stations across the country. "7th Dawn" is a local group that performs at area musical events.

Among Ourselves

The Linguistics Department sponsored its first guest lecture Dec. 4. Dr. Jack DuBois from the Anthropology Department at the University of California, Santa Barbara, gave a lecture on Mayan sign language.

Susan De Santis, an instructor in the Linguistics Department, and Dennis Cokely of the Learning Resources Lab, presented a paper they co-authored at the annual American Anthropological Association meeting in Washington, DC Dec. 5. The paper was entitled, "Turn Taking, Topic Maintenance, Attention Getting Devices, and Respondent Selection in a Deaf Classroom."

Dennis Cokely also gave a workshop at Madonna College Dec. 5-6 entitled, "Bilingualism: Implications for Deaf Education."

Bill Stokoe, director of the Linguistics Research Lab, presented a survey of general linguistics, language development and sign language to teachers in the Montgomery County school system on Dec. 2.

Jan Richardson, coordinator of planning for College Educational Resources, has been selected as an Outstanding Young Woman in America for 1980 and nominated as Outstanding Young Woman of Maryland.

Janice Welborn, Pre-School supervisor of KDES, has been sworn in as a committee member of Mayor Marion Barry's Commission on Early Child Development. The 31-member commission, which was established by the Day Care Policy Act of 1979, will review policy for day care facilities throughout the District. Welborn, who has been at KDES four years, will serve a two-year appointment.

OTG deadlines

Deadlines for submitting information to *On the Green* for publication are Fridays, 10 days prior to the publication date. Information can be sent to the Editor, *On the Green*, Alumni/Public Relations Office, Chapel Hall.

Publication date	Due to editor

Letters

Your article on OTG, Nov. 10, 1980 suggests that Dean Jean Shoemaker is Gallaudet's "first woman dean."

With respect to her, and those who preceded her, I think it should be noted that there were three women deans prior to the appointment of Dean Jean Shoemaker.

According to the records of the Gallaudet College Archives:

Elizabeth Peet taught Romance Languages and sign language at Gallaudet College for 50 years and was Dean of Women for 30 years before her retirement in 1951.

Elizabeth English Benson served on the Gallaudet College faculty from 1926 until she was appointed Dean of Women in 1950. She retired as dean in 1970.

Lottie L. Riekehof assumed the duties of Dean of Women at Gallaudet College from 1970 through 1974. She is now the chairman of the Department of Sign Communication.

Perhaps you meant that Dean Shoemaker was the first woman academic dean?

Audrey Armstrong

President's Office Notes

A bird's eye view of Kendall Green

Scenario: Karl, the bird, is flying on his usual route south. As he approaches Kendall Green, Lark, a veteran bird who has been in this area for years, comes over to greet him.

Karl: Hi Lark! How have you been? Can you tell me something about Kendall Green?

Lark: Hi Karl, sure, it's my pleasure. I'll give you a "bird's eye view" of the campus.

Karl: I notice that there are several changes down there. KDES looks much better with an improved playground and a new paved entrance at West Virginia Avenue. Hey, what's going on down there at the football/baseball/soccer field?

Lark: This athletic field is in bad condition. The surveyors are preparing the topography plan for the engineer. The engineer will design the irrigation system and the grading so that the field will not be muddy or dry all year round.

Karl: What about the area between the Plaza and Hall Memorial Building where the surveyors are?

Lark: That is the site for the new Dorm 6. The surveyors will provide exact elevations of this particular area for the architect. The architect is starting the design, and construction is expected to begin in late fall, 1981 or early spring, 1982. The students, I hope, will be able to live there in the fall of 1983.

Karl: Gee, that little plaza between the Learning Center and HMB looks very nice What is going on in the Learning Center?

Lark: It is now complete and is being occupied by the Gallaudet College Library and some College Educational Resources staff. There are classrooms in the new building, too.

Karl: What's happening in the old Ed-

ward Miner Gallaudet Library?

Lark: The old Library building will house the new Information Center and the Alumni/Public Relations offices. The architect is starting to develop the concept to meet the program prepared by the planning committee. Construction should begin sometime in the spring, and the building should be occupied in early summer of 1982 By the way, do you see the mall, south of the Learning Center?

Karl: Yeah, it needs a lot of work, but what about it?

Lark: The landscape architect is starting to develop the concept and will complete the drawings in about six months.

Karl: I hope the mall will look nice in the future Hey, I see that the new auditorium annex between the Student Union Building and Ely Hall is completely up. When will this complex be ready for use?

Lark: In May, if all goes well.

Karl: Wow, there is also a big hole with several spikes pointing up.

Lark: Where?

Karl: Right there beside the Auditorium.

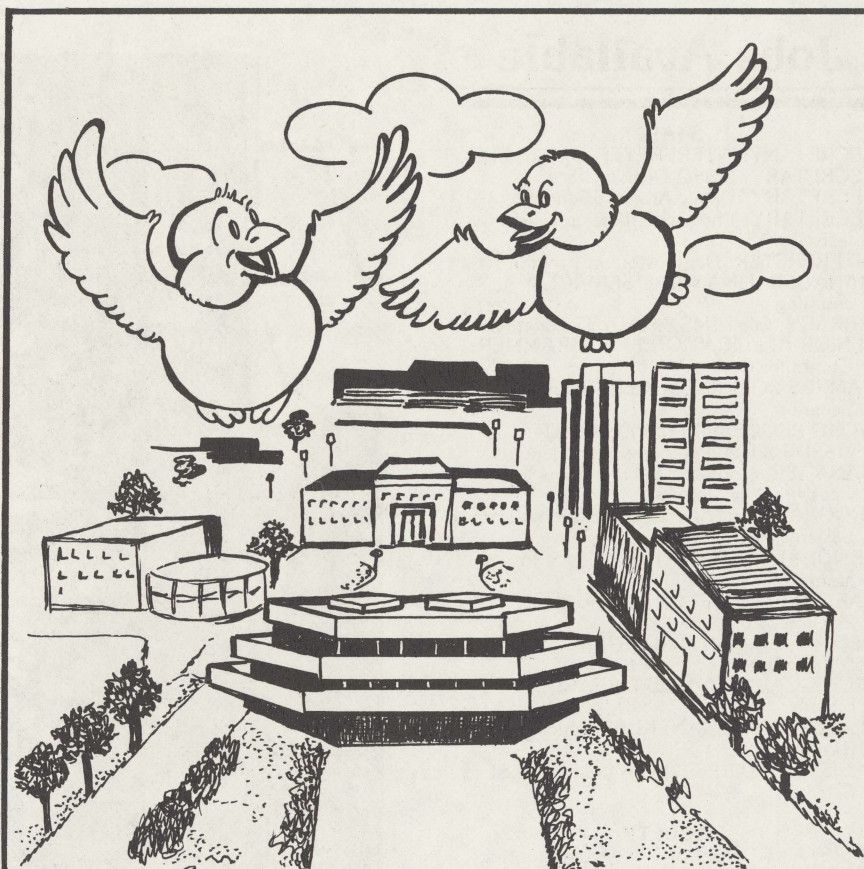

Lark: Oh, that hole. That is the site of the new Field House, and what you see is a concrete basement floor slab with concrete columns to support the first floor, which will have three basketball courts. Right now it's about 10% complete. This construction will be finished next year.

Karl: Let's land on that new roof next to the hole for a rest.

Lark: OK, fine with me . . . Here, we are now on the roof of the new addition to the Auditorium, which has been used by the Department of Theatre Arts since last November.

Karl: That is real nice. What is that huge pile of dirt doing there?

Lark: Oh, that will be used to upgrade the ground between Florida Avenue

Charles Robertson

and the Auditorium for proper drainage.

Karl: Gee, I hope there will be plenty of rich and juicy worms for me next year. Is there any more new construction for me to see before I head south?

Lark: Yeah, come on, fly with me to the west. This is Fowler Hall. A design will be prepared to give a rough idea of what it will cost for a complete renovation. This includes a new elevator. Now we are passing Chapel Hall. Nothing new is happening there now, but in College Hall next door, the architect is preparing drawings for a new elevator and modifications to the toilets for handicapped people. The construction is expected to begin in mid-spring. Let's go up north a little.

Karl: What for? I'm not going north,

I'm headed south.

Lark: There are some more buildings I want to tell you about.

Karl: OK, one more building.

Lark: Here is the Old Gym. The first phase of construction is completed, and the outside of the building looks the way it did a hundred years ago. Phase II construction will start in late spring, depending on completion of the architect's design. I hope the construction is completed in time for Homecoming next fall.

Karl: Good. Now I'm leaving.

Lark: Wait a minute, there are two more buildings I want you to see. That is the Arts Building, which will have a new elevator and toilet modifications. Mary Thornberry Building will have a raised floor around the hearing testing units so it will be accessible to the physically handicapped.

Karl: Sounds good. Gotta go now; I'll get in touch with you for a construction update on Kendall Green next year.

Lark: Thanks for stopping by. Have a good trip. Bye.

Karl: Bye.

The number is . . .

The new telephone number for the Central Desk in the Learning Center is x5585 voice and x5578 TDD. Other new numbers in the building will be printed in a future issue of OTG.

Grants

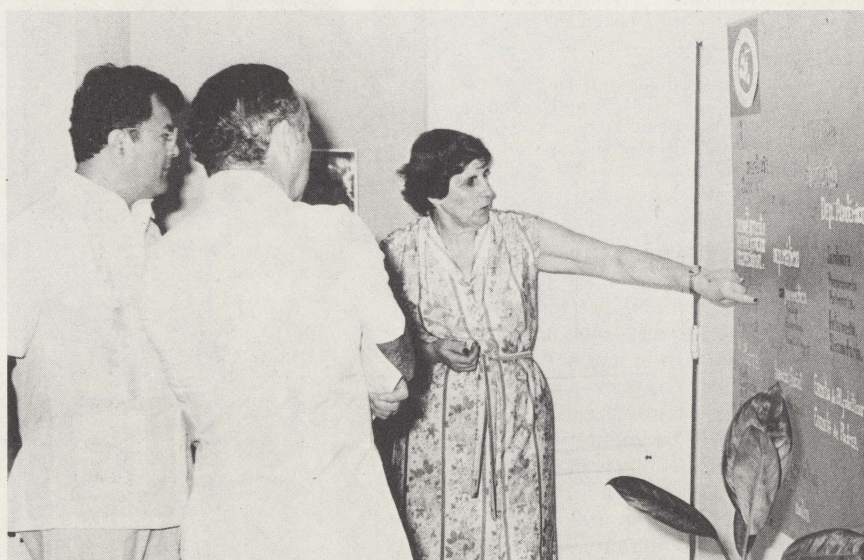

continued from page 1

\$100,000 in 1978. This fund was set up in honor of the former president of Teagle and was also designated for American undergraduate students.

The John Edward Fowler Memorial Foundation recently awarded a grant of \$25,000 to Gallaudet to be used according to the College's needs. This continues the Foundation's history of support for Gallaudet which began in 1975.

An \$18,000 grant from the National Home Library Foundation will be used to equip the self-study television room in the new Learning Center. This room will use visual learning devices in an individualized instructional setting to help improve communications. Through the use of videotapes and television monitoring equipment, students will be able to record, review and improve their knowledge of communication skills.

This is the second major grant awarded to the College by the NHL Foundation. In August, 1978 the Foundation awarded a \$25,000 grant which was used to fund a computer component that converts standard English into braille and prints braille materials under computer control for the use of deaf-blind students.

Sra. Maria del Carmen Medero de Mamán, director of the National School for the Deaf, Santo Domingo, the Dominican Republic, reviews the organization for nationwide services to the hearing impaired with Bob Davila, vice president for MSSD/KDES, and Gil Delgado, assistant vice president of Academic Affairs. The Gallaudet administrators were in Santo Domingo recently to conduct a workshop that was attended by more than 250 persons.

Published each Monday for staff and faculty of Gallaudet College by the Office of Alumni and Public Relations.

Sports update: basketball, swimming

by Mike Kaika

The women's basketball team played six games prior to the semester break. They won their first three games by impressive margins, defeating Marymount 82-40, Goucher 63-33 and Trinity 73-40. Just as the momentum was building, Notre Dame (Baltimore) stepped in and handed Gallaudet its first loss by a score of 71-58. Then Shenandoah battled the women to an 84-81 victory in overtime and Southeastern University held on for a 53-49 victory. Record as of the semester break is three wins and three losses.

The men's basketball team lost their season's opener to Western Maryland College by a score of 87-55. In their next game, Frederick Community College took command and dealt the Bisons their second loss, 85-68. During the Thanksgiving weekend, Gallaudet broke into the win column with a 67-65 victory over Penn State Capital College and almost notched their second win

the next day against Averett College but fell short in the end, losing 64-61. Three more games were played before the holidays rolled around and Gallaudet lost them all. The men's overall record is 1-6.

Coed swimming got off to a splashy start with a convincing 70-48 victory over Goucher College. Their second meet of the season was against Notre Dame and Gallaudet won it by a stroke 61-60. Only two meets were held going into the semester break but nine meets are scheduled for the second semester.

Correction

The Jules Olitski sculpture, whose future home was reported in the Dec. 8 issue of OTG to be in front of the Mary Thornberry Building, will be placed in front of the new Learning Center. The sculpture is now on temporary loan to the National Gallery of Art.
